SISVEL BECOMES THE ADMINISTRATOR OF THE DVB-S2 PATENT POOL

None Torinese, April 30, 2020 – The family of DVB programs administered by Sisvel keeps growing, thanks to the addition of the DVB-S2 patent pool. The program previously managed by S2 Licensing, is now part of Sisvel's license offerings related to the video technology field.

The DVB-S2 patent pool offers a fair, reasonable, non-discriminatory access to patents owned by AT&T Intellectual Property, LLC, RAI – Radiotelevisione Italiana S.p.A. and The European Space Agency (ESA) that have been determined to be essential for implementing DVB-S2, the digital satellite transmission system standard as defined in ETSI EN 302 307 part 1.

Further information about the terms and conditions of Sisvel's DVB-S2 licenses is available at <https://sisvel.com/licensing-programs/digital-video-display-technology/dvb-s2/license-terms>.

"We are glad to have the DVB-S2 patent pool among our licensing programs" said Davide Ferri, CEO of Sisvel Spa and Sisvel Technology. "Together with the DVB-S2X pool, Sisvel can now act as the reference point for this technology in the market, making the patents under DVB-S2 and the DVB-S2X standard (ETSI 302 307 Part 1 and 2 respectively) more easily accessible for the benefit of both licensors and licensees".

About DVB-S2

DVB-S2 is the "second generation" modulation and channel coding system developed by the DVB Project as a successor for the DVB-S system, covering a variety of applications by satellite such as broadcast services, interactive services, TV contribution and data content distribution. It makes use of advanced modulation and coding techniques to deliver performance that approaches the theoretical limit (Shannon) of a communication channel. It was published as ETSI EN 302 307 in 2005, and it is now defined as Part 1, with Part 2 being the DVB-S2X standard.

For additional technical information relating to the DVB-S2 standard, visit: www.dvb.org.

About Sisvel

Sisvel is a world leader in fostering innovation and managing intellectual property. The Group identifies, evaluates and maximizes the value of IP assets for its partners around the world, providing firms with a revenue stream which can be reinvested in innovation for the generation of future revenues. Founded in 1982, the Group is headquartered in Luxembourg and has subsidiaries in China, Germany, Italy, Japan, Spain, the United States and the United Kingdom. The Group has a long history of managing successful patent portfolios including those related to the audio compression standards known as MP3 and MPEG Audio, as well as broadcasting and receiving of digital terrestrial television standards maintained by the DVB Project. Sisvel currently operates patent pools and joint licensing programs in the fields of mobile communication; wireless local area networking 802.11; digital video broadcasting; recommendation engine and broadband access to data networks.
