

Sisvel is driven by a belief in the **importance of collaboration**, ingenuity and efficiency to bridge the needs of both patent owners and those who wish to access **their technologies**. In a complex and constantly **evolving marketplace**, our guiding principle is to create a level playing field with the **development and implementation of flexible, accessible, commercialisation solutions**.

WE POWER INNOVATION by providing tailored licensing solutions and patent pools for the delivery of world-class technologies.

We work with leading companies and research institutions from across the globe to unlock the full potential of their patents, while easing technology adoption and reducing frictions from the innovation ecosystem and facilitating IP dealmaking.
